<u>Answers to Vendor Questions pertain to the Facilities Condition Audit SOW</u>

1. Under Project Deliverables, Item 4, the vendor is asked to provide "programming, customization and upgrade services for ARCHIBUS Windows and web environments." What is the scope of the changes to be made to the system?

   Answer: Changes to the system will be based on State business needs discovered in the business analysis provided by the vendor. The State will evaluated vendor recommendations for changes to the system.

2. Under Project Deliverables, Item 5, the vendor is asked to provide "software licenses for three (3) environments and subscription for the ARCHIBUS Condition Assessment web module." Can the State provide any information on the number of users that will use the module and their roles/responsibilities?

   Answer: The estimate number of concurrent users is twenty five (25). Agency TIFM Administrators and field assessors.

3. To help the vendors provide pricing for training, can the State provide the number of users to be trained by role?

   Answer: Up to fourteen (14) TIFM Administrators.
